MRSI Remains Open to Support Essential Infrastructure Sectors

Dear Valued Customer,

On March 23, 2020, within our home state of Massachusetts, Governor Baker announced an Emergency Order based on Federal guidelines, which requires all **non-essential** businesses to close physical workplaces to workers, customers and the public, as of noon, Tuesday, 24th March. However, businesses supplying **Essential Services** (which are listed in the order) are expected to remain open. MRSI Systems is operating an **Essential Business** and will remain open. Specifically, MRSI falls within the following essential categories of sectors, Communications, Information Technology, Defense Industrial Base, and Healthcare and Public Health, by referencing the federal guidelines <https://www.cisa.gov/identifying-critical-infrastructure-during-covid-19>.

With the safety of our employees our #1 concern, we have a responsibility and an expectation on us to stay open, for our collective commitments to support the essential infrastructure industry, in this common fight over COVID-19. It is clear to us that all current local and federal mandates expect companies aligned with the above essential supply chains to maintain their normal work schedules. We are committed to manufacturing products for our customers and providing first class support to the very best of our ability at this challenging time.

For completeness, please see the link to MRSI's parent company announcement by Mycronic's CEO Anders Lindqvist on how we intend to support our customers throughout this crisis <https://www.mycronic.com/en/news/news-articles/managing-and-navigating-the-covid-19-crisis/>.
